

Welcome to our latest and most comprehensive ever collection of exterior lighting.

This catalogue brings together more than 450 great options to help bring light effectively and attractively to the outdoors.

Good and effective outdoor lighting plays an important role in today's marketplace, accenting property appearance, assisting with security and enhancing outdoor living spaces. We have also placed considerable emphasis on the uniqueness of the designs, the versatility of their use along with performance and quality of the product to ensure this is the catalogue of choice when requiring outdoor lighting solutions.

Amongst some of the highlights, this catalogue features a section dedicated to Outdoor Living space with lighting options including IP44 rated outdoor chandeliers as well as an industry leading Coastal Collection that brings style and design to locations facing the harshest of conditions.

LIGHT BOX™
COLLECTION

LIGHT BOX COLLECTION

The Lightbox Collection™ from Elstead lighting signifies ranges that have limited distribution through selected distribution channels. Take care when considering these ranges to ensure your status as a Lightbox partner. This selected distribution operates only in certain countries, so please contact your local sales office to check on your access to this range.

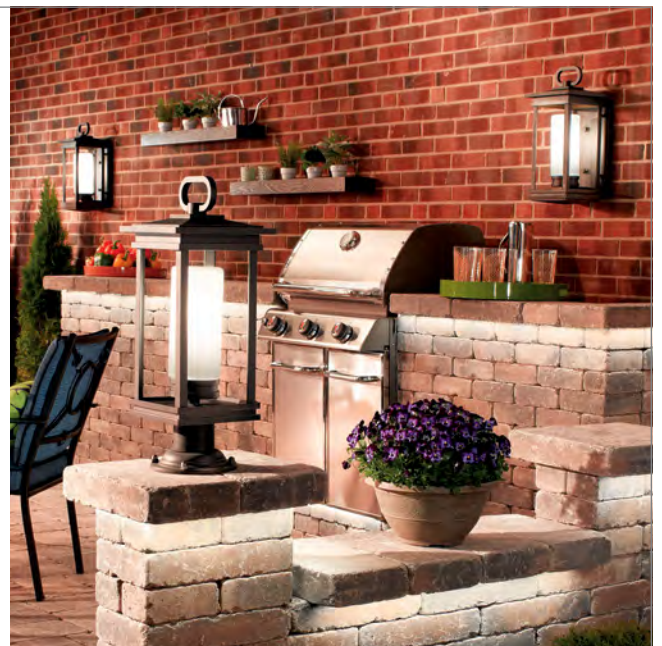

COASTAL

Planet earth is covered by more than 70% ocean, and has more than 620,000 miles of coastline. With a 3.5% content of salt in seawater, and with coastlines often accompanied by extreme temperatures, sun and high winds, it is no surprise that coastal damage due to saline conditions is one of the major outdoor lighting challenges in such locations. This Coastal range delivers solutions that use materials with this very much in mind. Robust, rust resistant and UV stable to resist the harshest of climates, these fittings combine technical competence with design, style and variety.

OUTDOOR LIVING

For the first time, we have brought together a series of dedicated products for outdoor living spaces, aimed to enhance and bring the indoors outside. More and more people, whether at home or in a hotel, bar or restaurant, enjoy being outdoors to eat, relax and spend social time together. Our Outdoor Living models offer new lighting options such as Outdoor Chandeliers to bring new life to these locations.

LITEC LED LAMPS

The majority of our outdoor fittings use E27 or E14 lamp-holders, which makes them suitable to use retrofit LED lamps. The Litec range offers an LED lamp solution for every such fitting in this catalogue. Using the latest LED filament technology, these energy efficient lamps offer good lumen output, look stylish with their retro vintage influences, yet run at a cool temperature and have a 25,000 hour life expectancy.

Certificate of Registration

QUALITY MANAGEMENT SYSTEM - ISO 9001:2015

This is to certify that:

Elstead Lighting Ltd
Elstead House
Mill Lane
Abley
GL14 2QT
United Kingdom

BSI Certificate Number:

FM 671247

and operates a Quality Management System which complies with the requirements of ISO 9001:2015 for the following scope:

Design, manufacture, sales including export of decorative lighting and fan lighting

For and on behalf of BSI:

Andrew Lavery, EMEA Systems Certification Director

Original Registration Date: 2018-03-07

Latest Revision Date: 2018-03-07

Effective Date: 2018-03-07

Expiry Date: 2021-03-06

Page: 1 of 1

Making excellence a habit.

SAFETY AND COMPLIANCE

Safety is paramount with all lighting, and especially when used outdoors. All of the products within this catalogue are manufactured to be safe and fit for their intended purposes. All products are CE compliant and are fully inspected and tested for electrical safety and function. They are all constructed to EN60-598 standards and are all IP rated to ensure suitable protection against the ingress of water. The company is also ISO9001:2015 certified by BSI for our UK headquarters and by SGS for our Polish subsidiary to further show commitment and competence in the manufacturing and supply of safe and reliable product.

OUR AMERICAN PARTNERS

We share our passion for design with our American partners who put their heart and soul into creating light fittings to excite and inspire. They too employ great energy and commitment to bring truly original design to their customers. Elstead Lighting is very proud to have strategic partnerships with Hinkley, Quoizel, Feiss and Kichler to manufacture under licence and distribute many of their products to the 220V-240V markets.

OUTDOOR LIVING

It has become a popular trend to extend home living areas into gardens, patios and verandas. Elstead have a number of more decorative IP44-based solutions that help to bring the inside outdoors. Either by using chandeliers or nesting multiple pendants over tables or seating areas, great style can be brought to these outdoor leisure areas.

Model shown: KL/VANDALIA8/M

These outdoor pendants take traditional inspiration, updated with on-trend orb styles. They are ideally suited to create dramatic clusters over a table or seating area. Vandalia comes in Textured Black and Halleron in a grey painted Londonderry finish. They all come with mouth-blown, clear seeded glass.

TRANSITIONAL

Transitional describes designs that derive from classic styles but have been conceived with a contemporary edge. Transitional lanterns are less ornate than their classic counterparts, but aren't as streamlined or minimalist as modern styles. They combine the best of both worlds for a clean, comfortable look wherever they are placed.

Mid-century for today's home, the Goldenrod outdoor series is intriguing yet classic. The rich Western Bronze finish of the base is accented with stripes of metal painted a lustrous Gold. The bevelled clear glass panels are in keeping with the overall design. Please note that the gold rods can be removed to simplify the design, or recoloured by the end user to create alternative looks.

CHELSEA HARBOR

These traditional, industrial coastal looking fittings are made to look like the work lanterns seen harbourside in the 1940's and 1950's. Hand made from aluminium material and painted in a Storm Cloud grey with black speckle finish, these attractive lanterns feature a mouth-blown, seedy glass to add to their authentic look.

Reminiscent of old railroad lighting, the Redding Station outdoor lighting collection warmly illuminates its surroundings no matter the residential architecture. The aluminium shades are designed to withstand the elements and feature prismatic diffusers that convey the vintage styling which has become so popular.

AMERICAN TRADITIONAL

Typically larger in scale and more detailed in design, the lanterns in this collection are almost entirely designed in North America, originally for the typical American style home. These fittings, often influenced by original European styles, bring more presence to where they are used, suiting both residential and hospitality situations.

Castle windows throughout Europe were designed with a wide variety of tracery, mullions and stonework elements. The Olde Bronze panels of the Franceasi lighting family were created with these wonderful windows in mind. The intricate details create delightful shadow patterns on adjoining wall surfaces and walkways, and include soft amber tinted glass panels.

BATON ROUGE

Every home can use a little extra curb appeal – that’s where this ornate lantern collection comes in. Gold lustre tinted glass and a warm Walnut finish enhance the intricate detailing beautifully. Each piece has a curvaceous form and perfect silhouette so it looks as dazzling in the daytime as it will when lit at night.

COUNTRY TRADITIONAL

This collection features styles influenced from period British and European lanterns from the last century. Although some of these are modern updates made of cast aluminium, others are still hand-made in iron to keep the authenticity. These lanterns are typically smaller in scale to suit picturesque cottages and small town houses.

TRADITIONAL LANTERNS

These designs take inspiration from lanterns of times gone by and come in various finishes including Bronze, Black and a textured Weathered Zinc. Several come with hinged doors to make changing lamps easier, inspired by the days when they would have been lit by candles, gas or oil.

SECURITY & PIR LANTERNS

This collection of outdoor fittings has a focus on security and convenience. All come with a passive infrared sensor (PIR) guaranteed against fault for two years. Use of a PIR sensor on an outdoor lantern minimises energy use without sacrificing the security gained from outdoor lighting. The efficient LED Sigmund further reduces the energy used.

COASTAL COLLECTION

The harsh nature of coastal environments challenge many product types that are used outdoors, particularly outdoor lighting. To combat the effects of saline and UV damage, we have brought together a wide collection of models, styles and options that fulfil these challenges without compromise to the design. Using premium materials, these ranges have been designed to resist these harshest of conditions whilst bringing great style to the location used.

COMPOSITE

- Strong and durable material that is robust in appearance and feel.
- All feature hand-made glass lenses.
- Excellent UV, corrosion and rusting resistance properties.
- Suitable for ocean-facing locations and exposure to the harshest conditions.
- Guaranteed for 5 years.*

see pages 136-147

POLYMER

- Extremely strong yet lightweight material.
- All use impact resistant polycarbonate lenses.
- Embedded colour for enhanced UV, colour and corrosion resistance.
- Suitable for ocean facing locations.
- Guaranteed 20 years.*

see pages 148-151

BRASS

- Solid high grade brass material used with glass panels.
- Robust yet hand crafted ensuring long life properties.
- Have lacquered finishes that will potentially age in harsh conditions.
- Can withstand ocean-side locations but will age / patina.
- Limited Lifetime warranty.*

see pages 152-166

MARINE MATERIALS

- Malaysian Teak and 316 stainless steel materials used.
- Robust and weather resistant to the harshest of conditions.
- Natural Teak wood needs maintenance for colour and lifetime protection.
- Non-ferrous supporting components used internally.
- 10 year limited lifetime warranty.*

see page 167

Models shown: FE/HODGES/L

With a soft, updated approach to the Prairie design style, the Hodges outdoor collection by Feiss has a simple yet refined farmhouse look. Great craftsmanship and technique is applied to bend the metal roofline and to create the loop at the crown. An Ash Black finish combined with Clear Seeded glass panels provides a warm welcome. Constructed of a weather resistant composite material for added strength, durability and longevity, the collection offers a 5-year warranty.

Model shown: HK/BINGHAM/L

Made of Solid Brass, Bingham's traditional style recalls a turn-of-the-century gas light reproduction. The vintage look is nautical in nature and recognises Hinkley's origins on the shores of Lake Erie. The brass construction features clear seeded glass and a Sienna finish, while candelabra lamping completes the authentic style.

Poole and Sandbanks use premier quality materials for extended durability. The stainless steel is Marine Grade 316 (as used on ships) and is designed to withstand the most challenging of conditions. The teak used is genuine quality wood from Malaysia and, if oiled seasonally, will keep its natural appearance for many years. We recommend that you use a small diameter LED lamp in these fittings, e.g. LED E27 candle.

MODERN

The interpretation of Modern lighting can vary. Designs can be based on anything from updated Scandinavian retro looks, to more clean and straight lined styles inspired by modern architecture. This series includes a mix of both, some incorporating integral LED for low energy consumption. All models suit both residential and commercial applications.

INGRID & ELVA

Both of these die-cast aluminium fittings can be used on walls or ceilings. The Elva gives a 4 way light spread, can be mounted as a square or diamond fixture and will give a stylish appearance when lit. The Ingrid features a graphite finished band which allows light to spread on the wall behind, creating a unique halo effect. Both products have a 5 year anti-corrosion guarantee*. The Elva has a dedicated LED light source and a T5 lamp is included with the Ingrid.

The clean lines and efficient design of the Jannik LED fittings make them suit many applications. They provide a good amount of ambient light yet give a distinct light spread to any wall they are mounted onto, making an attractive lighting design feature. The sharp modern Sorel outdoor LED light features straight lines and sharp corners in a solid Architectural Bronze finish. The clear architectural glass insures great visibility and curb appeal for any contemporary home.

TORSTEN & MAGNUS

The minimalist Torsten series is manufactured from aluminium and features opaque polycarbonate lenses. Due to their simple, yet stylish appearance, these fittings will be suitable for almost any application. The circular Magnus models are designed to have a softer appeal, being ideal for residential and hospitality situations. The 9W LED GX53 lamps are included with Magnus fittings.

Sigmund has been designed to exploit the benefits of LED lighting characteristics to their maximum. The Sigmund series features a 3 or 6 light fitting, with each bank of 3 LED modules being rotatable by 320 degrees. The 3 light is also available with a built in PIR sensor. They are constructed from die-cast aluminium and finished in graphite powder coating.

LANDSCAPE LIGHTING

WITH THE

PROFESSIONAL COLLECTION

The Landscape Professional Collection offers a versatile selection of high quality, easy to install and energy efficient products for all parts of the garden landscape, designed for use by professional gardeners, landscapers and architects.

Using our excellent low voltage plug & go system allows a large number of fittings from these ranges to be connected together over a distance of up to 80 metres. Furthermore, all the fittings within the plug & go series use LED light sources, which have very good light output properties alongside exceptionally low energy consumption. Added to this we offer a complementary range of 220-240V energy efficient models in matching designs as well as range accessories to ensure the widest possible choice.

PLUG & GO: HOW IT WORKS

plug
& go

Step 1: Choose the areas you want to have lit, then we suggest that you sketch a rough plan view of each area involved.

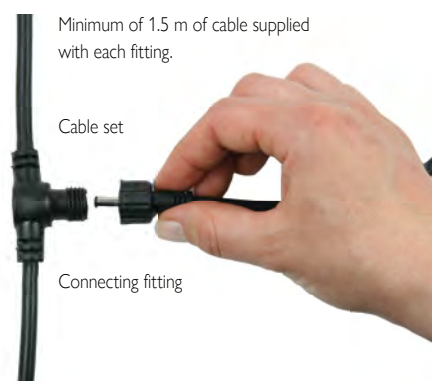

Step 2: Choose the fittings which will suit the requirements and list them out with the quantity of each where relevant. Be careful to bear in mind the voltage of the fittings chosen. All 220-240V fittings will need mains supply to wherever they are to be installed whereas all plug & go models just need to be connected into the low voltage cable (as shown below).

Step 3: Measure the distance involved for the plug & go models chosen and determine, from the cable set options available which cable set or sets will be needed. Remember, up to 80 metres of cable can be used from 1 LED driver but the wattage loading must not exceed the recommended minimum, maximum (see accessories page 209).

Step 4: Plan where the mains supply will originate from. With the plug & go system you have a choice of placing the LED driver/drivers in an IP rated wall box on an exterior wall. However, depending on how large an area is involved, sometimes more than one mains feed may be needed in different locations. Consultation with an electrician is advisable on this matter.

Important

Plug & go fittings use a unique single pin, 2 pole plug and as such are not compatible with any other product or system. Currently they are not dimmable but they will work when wired via a timer.

BRONZE COLLECTION

Our Bronze family is a premium range of products manufactured from heavy cast bronze and chemically treated to give a natural looking Aged Bronze or Verdigris finish. The Bronze family has a large number of options and accessory choices to enhance the finest of gardens. All of these classic designs are supplied with our 12V Plug & Go system using LEDs to be energy efficient, and easy to use and install.

ELITE COLLECTION

Stylish and versatile; the Elite family is manufactured from either marine grade aluminium, which is then polished and anodised, or from solid natural brass. Designed and hand engineered to the highest standards, the Elite range offers both 240V mains fed and 12V LED plug & go options. (Note: when used near the coast the fittings will tarnish/age quicker without maintenance.)

Guarantee / Life Expectancy

All Garden Zone fittings are guaranteed against structural failure for 5 years and 2 years for the LED units. The LED lamps have a minimum life expectancy at 80% plus efficiency for 20,000 hours. Typically if on 4 hours per day, 365 days per year, than this equates to around 14 years of life. The 2 year Guarantee is only valid when exclusively using Garden Zone cables, fittings and drivers.

Repair Service

Outside of the 2 year Guarantee we offer a chargeable full maintenance and repair service to fittings. This is conducted in our own workshops and the service includes replacement material parts and wiring repairs.

GZ/4W PG DRIVER

4W (min. load 2W, max. load 4W)
106mm L x 25mm W x 20mm D
IP67

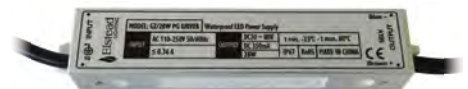

GZ/11W PG DRIVER

LP/LED9W/GX53	GX53 Lamp	24mm	75mm	9W (55W equivalent)	3000k (warm white)	25,000 hours	720 Lm	12,500

N.B. All lamps are UV free, suitable for 220-240v and are NOT dimmable.

TECHNICAL ADVICE & INFORMATION

PRODUCT WARRANTIES/GUARANTEES

GENERAL 2 YEAR GUARANTEE. All fittings supplied from this catalogue, both interior and exterior, have a manufacturer's minimum guarantee of 2 years. This means that in normal and fair service, (and without incorrect or inappropriate installation or location), any product sold by Elstead Lighting or its partners should have no fault develop within a minimum of 2 years from purchase. Any fault that is found is covered by guarantee to be repaired or replaced at the suppliers cost, within this period.

ALL Elstead warranties/guarantees do not cover out of pocket expenses or consequential costs.

LIMITED LIFETIME WARRANTY – This warranty relates to certain ranges/models shown in this catalogue which are produced of materials that have an exceptionally long life expectation, such as solid brass lanterns. These fittings may age over time, but will not deteriorate to an extent where they will no longer function for the purpose intended. The "Limited" element relates to component parts such as rubber seals, lamp-holders etc. which are repairable but are not covered by the Lifetime warranty.

15 YEAR WARRANTY AGAINST STRUCTURAL FAILURE – Those models listed as having a 15 year warranty are guaranteed, that from purchase to within 15 years of normal use, the fittings will not deteriorate to any extent where they experience any structural failure. There may be signs of aging, corrosion or paint fading, but the integrity of the construction of these fittings means they will not deteriorate to any extent where they are rendered unusable within a lifetime of 15 years.

2, 3, 5, AND 10 YEAR ANTI-CORROSION GUARANTEES – Many outdoor fittings have anti-corrosion guarantees stated on each relevant page. This guarantee relates to the corrosion of paintwork on cast aluminium or steel fittings, and excludes locations within 5 miles of the coastline. Fittings that have been damaged, repainted or cleaned with an aggressive cleaner may be excluded.

Prior to agreeing to replace any fittings, the company reserves the right for the original seller or a representative of the company to inspect the damaged parts and for photographic evidence to be supplied.

COASTAL COLLECTION 20 YEAR GUARANTEE – These fittings are designed to be placed in the toughest of conditions including right by the coastline without exclusion. This guarantee covers protection of the finish against corrosion or UV degradation.

COASTAL COLLECTION 5 YEAR ANTI-CORROSION GUARANTEE – This guarantee relates to the corrosion of paintwork on composite parts. In the instance that fittings have been damaged, repainted or cleaned with an aggressive cleaner they may be excluded from the entitlement to a replacement. Prior to agreeing to replace any fittings, the company reserves the right for the original seller or a representative of the company to inspect the damaged parts and for photographic evidence to be supplied.

LED MODULE AND PIR SENSOR GUARANTEES – Within this catalogue there are a number of products incorporating PIR sensors or LED modules. Whilst the fittings themselves may have varying physical guarantees against corrosion, these electronic parts are covered by a 2 year guarantee against failure. After this period, they are still repairable and serviceable, either by the company or local supplier.

GENERAL NOTES

1. FINISHES. Many of the finishes used on these ranges are hand applied (patinated) and some small variations and irregularities in the finish are to be expected. This is part of the process of manufacture and, far from being a problem, it is an important part of the nature of hand made and hand finished items.

2. LAMP-HOLDER TYPES. Most fittings are constructed with either E14 lamp-holders (small Edison screw, sometimes referred to as SES or with E27 lamp-holders (standard Edison screw, sometimes referred to as ES. Appropriate E14 and E27 lamps are widely available in a range of styles, wattages and light sources including incandescent, compact fluorescent and LED. Some of these lamp-holders are now supplied with threaded skirts, together with candle tubes and shade rings. This means that these products can be used either as a fitting with candle tubes and candle lamps, or with glass using the shade ring. Additionally we make certain fittings which use G9 and GX53 lamps. Lamps are usually supplied with these fittings.

3. WATTAGES. Most fittings shown in the catalogue are shown with Maximum Wattage recommendations. These recommendations are calculated mainly by heat capability, as there is a correlation between heat and wattage. However, in many countries traditional incandescent lamps, such as 100W GLS are no longer available. There are now many new versions of lamps in the market, lower wattage but similar light performance such as halogen replacement, compact fluorescent and LED. Most fittings wattage capacity and certification has been based on the criteria using an Incandescent lamp and so when choosing lamps, please take care to ensure that wattages specified are of no more than the equivalent original incandescent lamps. In the case of LED, the wattages are far lower, but some of these can still run very hot, not dissimilar to incandescent of much higher power.

5. FLUSH CONVERT/DUAL MOUNT. A few of the chain models are constructed so that they can be easily modified from a chain fitting into a semi-flush fitting. Note that once converted to semi-flush it is not then possible to easily convert back to a chain fitting, as some re-wiring is likely to be required.

6. CUSTOMISATION. Some of our ranges supplied in matt black can be relatively easily patinated into finishes such as Black/Gold, Black/Copper etc. Equally, for chain suspended fittings that need extra chain and cable, these can also be relatively easily undertaken. Both such modifications may incur longer lead times and will have small additional costs added to the price. (See current Elstead Terms and Conditions.) Beyond this, with appropriate lead time and client budget, more specialised changes can be undertaken such as different colours completely, changes to dimensions and design modifications and even fully bespoke fittings can be considered due to our varied manufacturing resources available.

EXTERIOR FITTINGS

1. INSTALLATION CARE AND MAINTENANCE. When installing all outdoor lights it is recommended to lightly grease all threaded parts and screws / nuts to ensure that fittings can easily be disassembled for cleaning or lamp replacement. When handling certain fittings / finishes such as polished copper they can easily finger mark, so it is recommended that bare hands on these surfaces is kept to a minimum. Please retain receipt and installation instructions for future reference.

2. FINISH MAINTENANCE. Many of our fittings are supplied in a natural finish, i.e. Polished Copper un-lacquered and Teak wood. These fittings can naturally age over time or to maintain their original appearance, treatment is needed, such as oil for teak, beeswax for brass and light oil for Copper and Stainless Steel. When handling finishes during maintenance, small marks may show which can be easily polished away if required. The alternative is to allow the material to age and weather naturally, which does no harm to the fitting. Additionally, when installing cast aluminium fittings, a light coating of beeswax or oil can give the finish

extended life, especially when in coastal areas. For all models, we highly recommend that exterior fittings are cleaned once per year with fresh water and oiled or waxed to give longer service. Lenses and glasses also benefit from cleaning but take care with polycarbonate or acrylic as these materials can easily scratch if any abrasive cloth is used.

3. IP RATINGS. All exterior fittings have an IP (Ingress Protection) rating which is a declaration of how much protection any product has against the ingress of both water and dust / particles. The minimum rating for an outdoor luminaire exposed to rain should be IP23 and the maximum can be up to IP68 (this can vary in different countries) which means the fitting is submersible. Most of our fittings are IP44 or greater and some of the Landscape models are up to IP67 meaning they can be covered by water up to a depth of 150mm, such as in-ground lights. See table below for full classifications. Typically, the higher the numbers, the higher the performance.

IP RATINGS

1st Digit (Protection against ingress of solid bodies)	Short Description	2nd Digit (Protection against ingress of moisture)	Short Description
0	Non-Protected	0	Non-protected
1	Protected against solid objects greater than 50mm dia.	1	Protected against dripping water falling vertically greater than 50mm diameter
2	Protected against solid objects greater than 12mm dia.	2	Protected against dripping water when the Luminaire is tilted up to 15° from its normal position
3	Protected against solid objects greater than 2.5mm dia.	3	Protected against spraying water falling on the Luminaire at any angle up to 60° from the vertical
4	Protected against solid objects greater than 1mm dia.	4	Protected against splashing water from any angle
5	Dust-protected	5	Protected against water jets from any direction
6	Dust-tight	6	Protected against powerful water jets
		7	Protected against immersion in water under defined conditions
		8	Protected against continuous submersion under manufacturers specified conditions
Example IP65 Dust-tight and protected against water jets from any direction.			

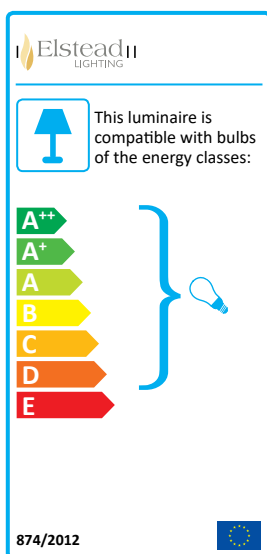

COMPLIANCE/APPROVALS

All products within this catalogue conform with the European Union Low Voltage Directive, BS EN 60598-1:2008, the product standard for luminaires recognised across Europe and all fittings are CE marked. Every luminaire is individually tested by Elstead Lighting to ensure that the product is electrically sound and meets the company's quality standards. A unique test / batch number is then applied to the fitting. Please contact us for further details or advise us of your local needs.

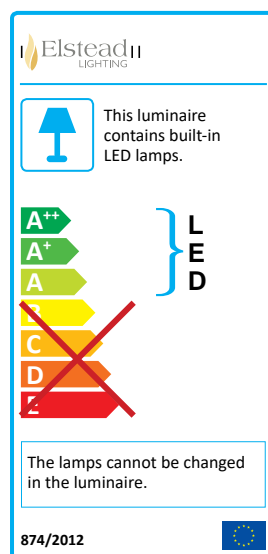

We are manufacturing members of the UK Lighting Industry Association and conform to all aspects of the Lighting Industry Association Code of Practice for luminaire production.

ENERGY RATINGS FOR LUMINAIRES

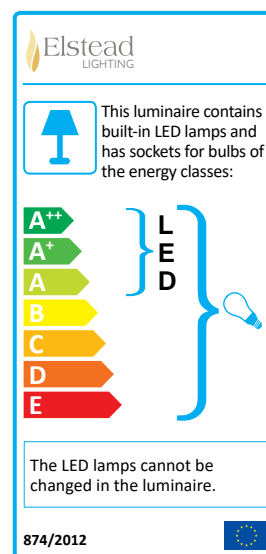

Please see the relevant energy rating label for the corresponding lamp holder type. Please note that, with the very large number of lamp options available in the market, it is impossible for our luminaires to accurately reflect all choices. But all lamps able to be bought in the market should have their own dedicated energy rating performance clearly stated on their packaging.

All luminaires with replaceable lamps. Incandescent, fluorescent or LED.

Dedicated LED fittings.

Some of our luminaires combine built-in LED with replaceable lamps.
